

Sustainable Furniture and Furnishings in the Design World Today

The practice of design today is moving towards sustainability. What are we doing with our interior spaces once we build green buildings and green homes? What do people need & what are they looking for? Creating sustainable and healthy interior environments with sustainable furniture and furnishings is key in designing today's interiors. The Sustainable Furnishings Council (SFC) provides valuable resources to architects and designers with sustainable products, manufacturers and services. Come join us at Circle Furniture for an introduction on conscious sustainable interiors by Design Veritas and a presentation on the sustainable furniture and furnishings industry by the Sustainable Furnishings Council.

May 8, 2014

5:30pm-7:30 pm
